Hispanic Status Unknown	-	-	190,092	7%			(21 states)
TOTAL	-	-	2,768,471	100%			(31 states)

Note:

This Table uses data from URS/DIG Table 2a, Table 2b and from the U.S. Census Bureau.

All denominators use U.S. Census data from 2000.

U.S. Totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

2a The MD State Hospital (SH) database, that includes Regional Institutes for Children and Adolescents (RICAs), is maintained separately from Other Hospital Inpatient and Community Programs data maintained by Maryland Health Partners. For this year's report, it is not possible to cross-match the two databases; therefore, information from the two databases is shown separately. There may be duplication of consumers between the two sets of information of about 3000 individuals. Also, current data does not capture more than one race reported.

2b Table figures are not currently available, as described. MD's current data system tracks Hispanic/Latino as a race category, not as ethnic origin.

Note:

Note: This Table uses data from 2 sources: DIG Table 5a, 5b (Hispanic Origin), DIG Table 2a (Total Served), and Table 2b (Hispanic Origin Total Served)
Data is based on duplicated counts

State Notes:

2a The MD State Hospital (SH) database, that includes Regional Institutes for Children and Adolescents (RICAs), is maintained separately from Other Hospital Inpatient and Community Programs data maintained by Maryland Health Partners. For this year's report, it is not possible to cross-match the two databases; therefore, information from the two databases is shown separately. There may be duplication of consumers between the two sets of information of about 3000 individuals. Also, current data does not capture more than one race reported.

2b Table figures are not currently available, as described. MD's current data system tracks Hispanic/Latino as a race category, not as ethnic origin.

5a Medicaid and non-Medicaid figures for State Hospitals/RICAs are listed separately from Other Hospital Inpatients and Community Programs. There may be duplication of consumers between the two MA lines and between the two non-MA lines. For this year, it is not possible to cross-match the separate databases. Current data does not capture more than one race reported.

5b Table figures are not currently available, as described. MD's current data system tracks Hispanic/Latino as a race category, not as ethnic origin.

12.3.a2. Percent of Children through the SMHA who had a co-occurring MH and AOD Disorder	10%	5%	4%
12.2.a. Percent of Adults served through the SMHA who had a co-occurring MH and AOD Disorder who meet the Federal definition for SMI	59%	20%	20%
12.2.b. Percent of Children served through the SMHA who had a co-occurring MH and AOD Disorder who meet the Federal definition for SED	11%	9%	3%

Note:

This Table uses data from URS/DIG Table 12

State Notes:

Cleaning of data and the time factor required to reliably compare figures from two data systems did not allow us to report this kind of unduplicated match this year. We expect to report unduplicated counts next year. 2) MD's database system for Other Hospital Inpatient and Community Programs is built on billing and claims information. Since claims can be submitted for up to nine months following the delivery of service, we can reliably report approximately 85% of the figures for FY 2002 (7/1/01 - 6/30/02) at this time. Maryland understands that we may resubmit Basic Table figures when more complete FY2002 consumer data is available in April 2003. State Hospital/RICA Data: The database for State Hospital/RICA consumer information is maintained by a separate Hospital Management Information System. Report data is based on individuals who received inpatient mental health services provided by 11 State Hospital facilities (includes 3 RICAs). Other Hospital Inpatient: Figures are from FY 2002 Medicaid and claims data, as of August 31, 2002. Maryland Health Partners (MHP), a statewide administrative services organization (ASO) hired by MHA, manages the database for Other Hospital Inpatient consumer information. Report data is based on individuals who received inpatient care provided by private psychiatric hospitals and general hospital units. Community Program

**OUTCOMES DOMAIN: TABLE 1. EMPLOYMENT STATUS OF ADULT MENTAL HEALTH CONSUMERS
SERVED IN THE COMMUNITY BY AGE AND GENDER

Unknown	-	NA	NA	-	-	27%	-	24%	13
TOTAL	-	NA	NA	-	-	36%	-	21%	40

Note:

* Mental Health Adults in Labor Force is the sum of MH consumers employed plus unemployed

** Adults Served in Community excludes persons for whom employment status was unknown

*** Includes persons who are "not in the labor force" according to BLS definition. Many of these individuals would likely seek employment if it were available.

MH Consumers Employed as % of Total Adults Served uses Adults Served as the denominator

MH Consumers Employed as % of Adults served in Labor Force uses persons employed or Unemployed as the denominator

This Table uses data from URS/DIG Table 4

State Notes:

Table figures are not available. Currently, data extracted from files on Medicaid enrollees, as well as information on Medicaid-ineligible consumers, does not track employment status.

2. Populations covered in survey?	Sample of MH Consumers	Sample = 31 All Consumers = 12
4. Please describe the populations included in your sample: (e.g., all adults, only adults with SMI, etc.)		
4 Ans. All adults authorized to receive mental health services between February 1 - March 31, 1999		39

State Notes:

Table 11 figures only report results from the FY 2002 MHSIP Consumer Survey. Since the YSS-F Consumer Survey tool was not used that year, we cannot report child and adolescent results. The YSS-F for FY 2003 is now in place and currently being conducted. The requested method of analysis, according to federal guidelines, will be in place and used to complete next year's URS/DIG report. The FY 2002 MHSIP Consumer Survey analysis was not based on each respondent's answers; rather, the mean for each item was calculated for the whole group of respondents to a question. Therefore, it is not possible to follow the federal scoring guidelines and methodology with regard to the number of item each respondent answered from each domain. In other words, we cannot know for certain that each respondent answered at least 2/3 of the items within each domain. However, in reviewing the number of responses across items, it seems likely that each respondent answered at least 2/3 of the items within each domain. Therefore, the figures reported in Table 11 represent the mean for each domain calculated with that assumption. Maryland conducted the 28-item MHSIP Consumer Survey exactly as written, but added additional
